

Diving into Huawei Cloud

Foreword

- This chapter covers the basic concepts of cloud computing and then provides an in-depth introduction to Huawei Cloud.

Objectives

- Upon completion of this lesson, you will learn about:
 - Basic concepts of cloud
 - Advantages of cloud
 - Infrastructure of Huawei Cloud
 - Ecosystem policies of Huawei Cloud
 - Log in to Huawei Cloud

Contents

- 1. Basic Concepts and Values of Cloud Computing**
2. Huawei Cloud Infrastructure Architecture
3. Core Services on Huawei Cloud
4. Huawei Cloud Ecosystem
5. Log in to Huawei Cloud

ICT Developments

PCs

Mobile Internet

Cloud

Headaches Caused by Traditional IT Infrastructure

Slow service rollout

Requires weeks or even months

Headaches Caused by Traditional IT Infrastructure

Low resource utilization and high TCO

Hardware resources are used by specific service software, meaning tight hardware-software coupling.

Inflexible resource allocation

Headaches Caused by Traditional IT Infrastructure

Complex scaling

Unpredictable business changes

Headaches Caused by Traditional IT Infrastructure

Challenging O&M due to geographically dispersed infrastructure and time-consuming service recovery

Moving IT Architecture to the Cloud

What Is Cloud Computing?

1

2

Over the Internet, application programming interfaces (APIs) are used to obtain and schedule resources, making them available to users on an "as needed" basis. Users only pay for the resources they use.

Values of Cloud Computing

Less investment in fixed assets

Abundant resources

Quick resource acquisition

New O&M methods

No guessing of required capacity

Operations across geographical locations

What Are Cloud Services?

- Cloud services are an on-demand and measurable IT service model underpinned by cloud computing architecture.

Huawei Cloud Services for Common Components

Cloud Deployment Models

Private cloud: Owned and managed for exclusive use by a single organization

Public cloud: Owned and managed by a third-party cloud service provider and shared with multiple organizations over the Internet

Hybrid cloud: A combination of public and private clouds, viewed as a single cloud externally

Cloud Service Models

Cloud service models are ever-evolving. Generally there are three types:

- Infrastructure as a service (IaaS)
- Platform as a service (PaaS)
- Software as a service (SaaS)

Contents

1. Basic Concepts and Values of Cloud Computing
- 2. Huawei Cloud Infrastructure Architecture**
3. Core Services on Huawei Cloud
4. Huawei Cloud Ecosystem
5. Log in to Huawei Cloud

Huawei Cloud's Global Presence for One-Stop Services

Huawei Cloud Infrastructure Architecture

Infrastructure at All Levels Extends to All Scenarios

One distributed cloud

All-scenario coverage

One distributed network

Easy and secure access

One operating environment

Consistent experience

One management system

Fine-grained enterprise governance

Challenges for being all-in-cloud

Resources across regions

Headquarters, branches, and outlets

Diverse scenarios

Latency, cost, and localization

Diverse workloads

Multiple technology stacks and networks

Multi-level organizations

R&D, finance, manufacturing, and supply chain

Contents

1. Basic Concepts and Values of Cloud Computing
2. Huawei Cloud Infrastructure Architecture
- 3. Core Services on Huawei Cloud**
4. Huawei Cloud Ecosystem
5. Log in to Huawei Cloud

Core Service: Computing Cloud Service

Elastic Cloud Server
ECS

Image Management Service
IMS

Auto Scaling
AS

Core Service: Container Service

SoftWare Repository for Container
SWR

Cloud Container Engine
CCE

Cloud Container Instance
CCI

Core Service: Storage Service

Object Storage Service
OBS

Elastic Volume Service
EVS

Scalable File Service
SFS

Core Service: Network Service

Elastic Load
Balance
ELB

Network ACL

Elastic IP
Address
EIP

Virtual Private Cloud
VPC

Network Address
Translation
Gateway
NAT Gateway

VPC Peering

Core Service: Database Service

Cloud Database
GaussDB

Relational Database Service
RDS

Cloud-native multi-model database
GeminiDB

Core Service: Security and Management Service

Data encryption Workshop
DEW

Identity & Access Management
IAM

Cloud Trace Service
CTS

Quiz

What are the deployment models of cloud computing? ()

- A. Public cloud
- B. Private cloud
- C. Hybrid cloud
- D. Community/Industry cloud

Acronyms and Abbreviations

- AZ: availability zone
- IaaS: infrastructure as a service
- PaaS: platform as a service
- SaaS: software as a service
